## How Buying Down Your Mortgage Rate Works

- When you apply for a home loan you'll be given the opportunity to buy down your rate
- This requires paying mortgage discount points out-of-pocket at closing
- These points are a form of prepaid interest that reduce your interest rate
- It's totally optional and ultimately boils down to whether you want an even lower rate

On loans that are conforming (Fannie Mae & Freddie Mac) you can "Recast" your loan if you make additional "principal reduction payments" above the required monthly payment. If you have made great than \$5,000 in additional principal payments you can reduce your monthly payments without needing to do an expensive refinance (Paying off your home faster)
